SUMMARY

Motivated Bachelor of Science in Information Technology student and Academic Scholar seeking a Backend Developer internship. Ranked in the Top 1% of the Web Development track, I aim to leverage my Full-Stack capabilities (Flutter, Angular, and Node.js) to build efficient, scalable systems while contributing to rapid technical growth within a professional team.

PROJECTS

HAU Eco-Quest | MERN Stack (React, Node.js, MongoDB)

- Architected a gamified sustainability platform with secure JWT authentication and Role-Based Access Control (RBAC).
- **Link:** <https://hauecoquest.vercel.app>

The Wellness Apparel | PHP, MySQL, Bootstrap

- Developed a full-stack e-commerce app featuring a custom Admin CMS, secure cart logic, and inventory management.
- **Link:** <http://the-wellness-apparel.onlinewebshop.net>

Chanel Website Replica | HTML5, CSS3, JavaScript

- Engineered a pixel-perfect, fully responsive frontend clone demonstrating precision UI/UX implementation.
- **Link:** <https://prelim-project-thefourwhoadore.netlify.app/home>
